

NERDS BOARD

Introduction

In an era of continuous developing online startups, NerdsBoard team decided to conquer the tech business platforms with solid solutions and services.

What we do?

We care about quality rather than quantity, which means we do our job in the perfect manner that exactly fits our customer's needs, tastes and deadlines.

We are experienced in the following technologies:

- Web Applications & frameworks
- E-Commerce Platforms
- UI/UX Design
- Mobile Apps development (Android, IOS)

Where we want to go?

NerdsBoard aims to be among the most successful software houses in Egypt who specializes in providing web & mobile applications across worldwide.

Our Projects:

1- FadFada:

- Android mobile application.
- Chat application between consultants and clients in different fields.

2- Freelancer Engine:

- Website which works as communication channel between the freelancer and employer.

3- Payment Gateway:

- Payment solution which works as a service for e-commerce sites to facilitate payment options.
